What is Google Apps?

Google Apps is a service from Google for using custom domain names with several Google products. It features several Web applications with similar functionality to traditional office suites, including: Gmail, Google Calendar, Talk, Docs and Sites.

We Setup E-mails with Your Domain

Imagine how valuable it would be if your entire organization - employees, customers and suppliers - could share information and ideas more easily. Google Apps for Domains brings together essential services to help your business communicate and collaborate more effectively.

Google Apps gives everyone at your organization a custom email address, tools for word processing, spreadsheets and presentations, a shared calendaring system and access to a flexible intranet system... all with your own domain (e.g. yourcompany.com) helping them stay connected and work together more effectively. They can share files and collaborate in real time.

We Setup email configuration and the implementation of any and all Apps components you want. Our team at Shwe.Net support / maintain your Google Apps (or any of its services) at very low cost. Our services are ideally suitable for all business who have implemented Google Apps and are looking for cost effective options for support. You can chose the package based on your need. We do not ask for any long term commitment.
